

IHP-2200

INDUSTRIAL HOOK PLEATING MACHINE

Original Juki High-Speed Sewing Head

- One-needle lock stitch machine with adjustable top/bottom feed
- Servo synchronized

Adjustable Pleat Spacing

- Full control of the pleat length and depth
- Adjust the distance between the pleats by laser positioning: 60 mm to 165 mm / 2.3" to 6.5"

Touchscreen

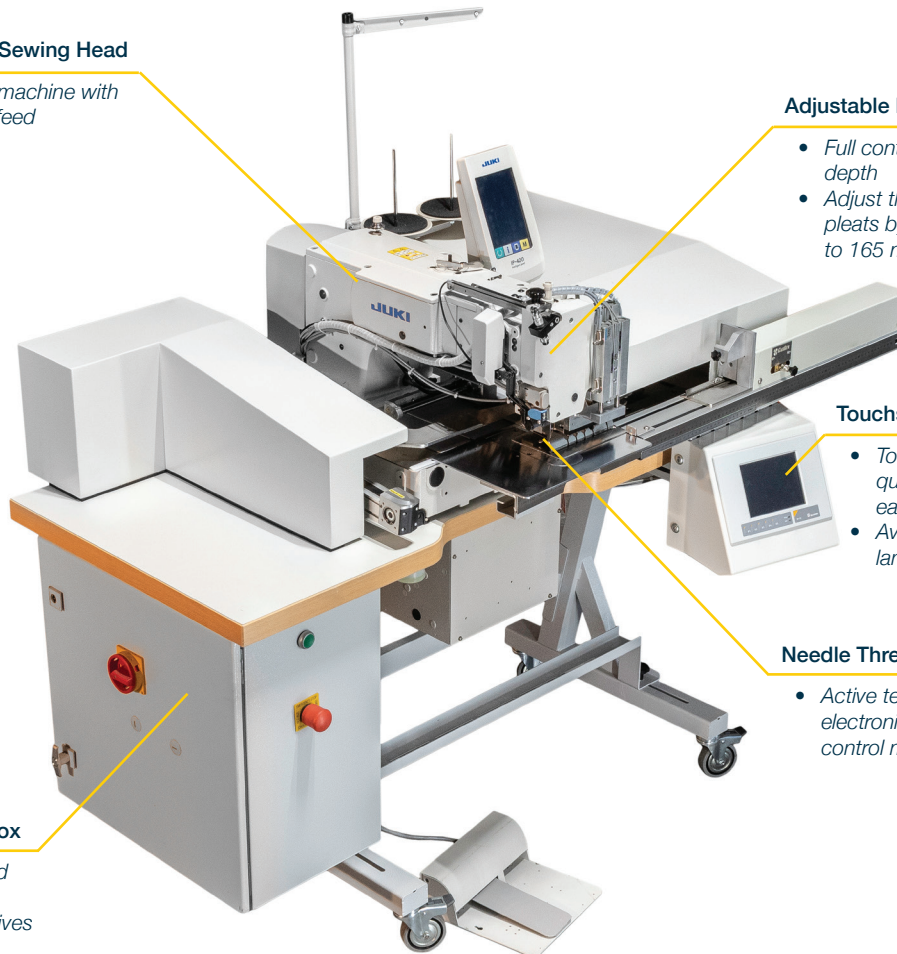

- Touchscreen interface for quick adjustments and easy selections
- Available in multiple languages

Needle Thread Tension

- Active tension with electronic thread tension control mechanism

Accessible Control Box

- CE and UL certified
- Festo controller
- Servo motors & drives

TECHNICAL SPECIFICATIONS

- Pleat Length: Up to 150 mm / 5.9"
- Pleat Depth Adjustment: 15 mm to 125 mm / .5" to 4.9"
- Max Sewing Speed: 2,500 sti/min
- Machine Width: 1350 mm / 53"
- Machine Depth: 850 mm / 33"

REQUIREMENTS

- Electric: 240VAC, 2400 W
- Air: 5 Bar, 3L Per Cycle

A GLOBAL LEADER IN WINDOW TREATMENT MANUFACTURING AUTOMATION

Joos Advanced Technology builds state-of-the-art industrial machines to create efficient, cost-saving, automated production processes. Our advanced technology has made us a global leader in supplying innovative equipment for the shades, blinds, and curtains industry for over 20 years. Our machines have been installed in over 20 countries around the world as the industry demand for our equipment continues to increase.
